

A Christmas Tree Gauge for All Seasons

Type 1020S
Pressure Gauge

The Ashcroft® Type 1020S pressure gauge is specifically designed for monitoring pressures on "Christmas tree" control assemblies located on top of oil and gas wellheads. This rugged 4 ½" diameter gauge is constructed with stainless steel exterior and wetted parts to resist the potentially damaging effects of petroleum pressure media. Available in ranges from 0/1000 psi through 0/20,000 psi and equipped with the proven Ashcroft® rotary movement, the Type 1020S "Xmas Tree Gauge" provides the best features for years of dependable service in harsh oilfield operating conditions.
