

# If Level Switch Reliability Means Anything to You, **Listen Up!**

Jerguson® Level Switches are proven the most reliable in the world. Our unique Snap-Action, tri-magnet design eliminates mercury & springs, meaning

- *no sticking switches*
- *not sensitive to temperature*
- *vibration resistant*
- *no spring failures*

## Have You Heard the Latest in Reliability?

Visit the website below to sign up for an on-site evaluation of your problematic level switches. There is no cost or obligation to you. And just for listening, we'll give you a pair of top quality Bose headphones.\*

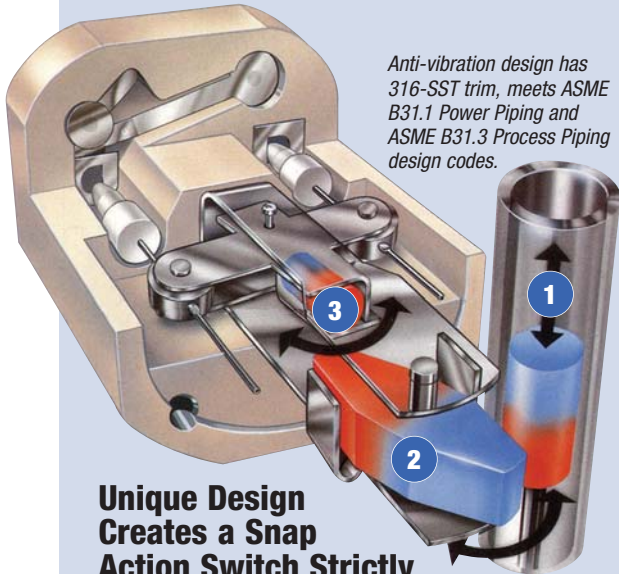

Bose® IE2 Headphones

**BOSE**

\* If your company has restrictions on gifts, we are happy to make a donation in your company's name to your favorite charity.

## Reliability is a Snap

*Anti-vibration design has 316-SST trim, meets ASME B31.1 Power Piping and ASME B31.3 Process Piping design codes.*

### Unique Design Creates a Snap Action Switch Strictly Through the Use of Repelling Magnetic Fields

*No mercury; no cams or springs; highly vibration-resistant; not temperature sensitive*

- 1 Magnet on float rod inside pressure tube drives secondary magnet.
- 2 Secondary magnet drives tertiary magnet, which drives the switch contacts.
- 3 Each magnet repels the other, creating a positive snap action interlocking switch.
- 4 Tested to over 250,000 cycles (DPDT) and over 850,000 cycles (SPDT) without failure.
