

# AUTO RODDER

**Safe. Accurate. Efficient. Profit-Generating.**

Puffer-Sweiven is the exclusive distributor of Clearguard's Autorodder in the Texas Gulf Coast and Central Texas. As your trusted local partner for reliability and performance, we deliver expert support and proven results to help you operate with greater safety, efficiency, and precision. Our team works closely with you to understand your unique needs, streamline implementation, and provide ongoing support.

The Autorodder is a simple, safe, and cost-effective automated solution designed to keep instrument tapping points clear by preventing blockages before they occur. This proactive approach ensures precise control measurements, real-time reliable data, and reduced maintenance and downtime.

## Engineered for Simplicity. Built for Safety. Proven Worldwide.

Ensure your process runs smoothly, safely, and accurately. Ingenious in design and function, the Autorodder combines smart design with practical functionality, using standard components for easy integration and on-site serviceability. Its proactive operation keeps tapping points continuously clear — preventing blockages before they happen and eliminating the need for risky maintenance practices.

Trusted in demanding applications across the US, Australia, Europe, the UK, India, Southeast Asia, Saudi Arabia, and the UAE, the Autorodder is a proven global solution for automated tapping point maintenance.

### Safe

An automated device that replaces high-risk manual rodding out.

### Profit-Generating

Expect a return on your investment within the first six months.

### Accurate

Tapping points are kept open 24/7, enabling precise real-time data.

### Unrivaled

The only automated solution available to manual rodding out.

### Efficient

Eliminates unit outages or plant shutdowns due to plugged taps.

## Fossil Fuel

Reliable pressure measurement restores confidence in system performance, allowing equipment like large axial fans to operate at peak efficiency and preventing shutdowns due to failure.

## Chemical

Accurate, continuous process variable measurement ensures field instruments perform at their best — critical in environments where precision is non-negotiable.

## Mineral Refining

Filter flow systems are automatically and continuously cleared, eliminating blockages and reducing the risk to personnel from manual cleaning.

## Oil Refining

Regular cleaning of tapping points prevents buildup, ensuring consistent level, pressure, and flow readings — essential for avoiding potentially catastrophic failures.

# Autorodder Installations

## About Us

Since 1979, Puffer Rotating Equipment (formerly Bullen Pump) has delivered reliable, high-performance solutions for the most demanding industrial applications. We offer a robust portfolio of premium products, including Moyno progressing cavity pumps and grinders, Roto-Jet Pitot tube pumps, Zenith precision gear pumps, Grundfos smart dosing pumps, Brawn mixers and more. Our experienced service team supports all brands and types of rotating equipment, ensuring reliable performance and maximized uptime.

## Testimonials

“The Autorodders keeps our instruments working.”

“It's (the Autorodder) a simple device that keeps our technicians out of harm's way – and does exactly what it says on the box!”

“Since we successfully implemented Autorodders, we have not had any issues with plugging or unit trips caused by bad PV (pressure variable) measurement.”

“You can trend em' and trend em' all you like, you won't see a blip when it (the Autorodder) strokes.”

“Operations don't have to touch the taps anymore, so they're ecstatic.”

“The scraper tip is the diamond on the very nice engagement ring.”
